## MEETING ANNOUNCEMENT

The Workshop on the Epidemiology of Skin Diseases will be held March 25-26, 1993 at National Institutes of Health, Building 31, Conference Room 10, 9000 Rockville Pike, Bethesda, Maryland.

Objectives will be to present attendants with a current overview of the present status of epidemiological research into skin diseases, including but not limited to chronic cutaneous ulcers, dermatologic aspects of HIV infection, ichthyosis, non-melanoma skin cancer, psoriasis, and toxic epidermal necrolysis; to identify areas in which epidemiological studies could advance the understanding, management, and prevention of skin diseases; and to encourage more research into the epidemiology of skin diseases.

Potential participants include dermatologists and epidemiologists with an interest in skin diseases.

The Planning Committee is comprised of Robert S. Stern, M.D., Harvard Medical School, Boston, Massachusetts; Martin A. Weinstock, M.D., Ph.D., VA Medical Center, Providence, Rhode Island; David W. Kaufman, Sc.D., Boston University School of Medicine, Massachusetts; Kayvon H. Safavi, M.D., M.P.H., St. Luke's Medical Center, Milwaukee, Wisconsin; Alan Moshell, M.D., National Institute of Arthritis and Musculoskeletal and Skin Diseases, Bethesda, Maryland; and Reva C. Lawrence, M.P.H., National Institute of Arthritis and Musculoskeletal and Skin Diseases, Bethesda, Maryland.

The workshop is sponsored by the National Institute of Arthritis and Musculoskeletal and Skin Diseases (NIAMS).

For information and pre-registration call Suzanne Sangalan at (301) 496-0803.
